

VACUUM SYSTEMS FOR ON BOARD MACHINERY APPLICATION

- Compact models, ideal for installation directly on industrial machinery.
- Multi-stage filtration with optional HEPA filter for maximum safety.
- Ideal for preventing cross-contamination in the food or pharmaceutical industries.

CENTRALIZED INDUSTRIAL VACUUM SYSTEMS

- Power up to 39 HP.
- Simplifies and speeds up the cleaning of entire buildings.
- Fully customizable systems.
- Simultaneous suction in several places.

COMPRESSED AIR POWERED VACUUM CLEANERS

- Ideal where it is not possible to use electricity.
- Wide range for every use.
- Intrinsically safe versions of the vacuums available.

INDUSTRIAL PRE-SEPARATORS

- Increases storage capacity up to 350 gal.
- Simple and safe to handle
- Possibility of choosing different discharge systems.

HIGH PERFORMANCE VACUUMS SINCE 1972

WET AND DRY INDUSTRIAL VACUUMS

- Compact, handy and easy to use vacuum cleaners equipped with 2 or 3 single-phase motors.
- All available with HEPA 14 filtration (0.18 μ efficiency).
- Dust collection capacity of up to 26 gal.
- Liquid collection capacity of up to 36 gal.

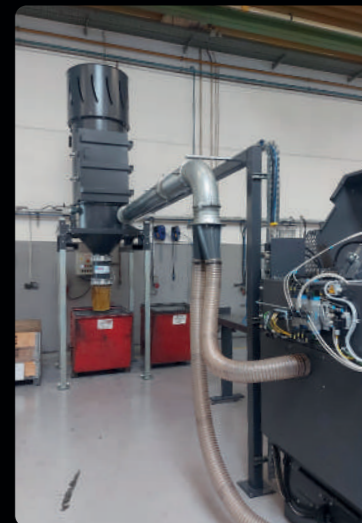

INDUSTRIAL DUST COLLECTORS

- High air flow rate for extracting fine suspended dust.
- Prevent dust dispersion in the working environment.
- Available with suction arm or for direct connection to production machinery.
- Compact Welding Fumes extractors available.

SUMP VACUUMS FOR OIL AND SWarf

- Vacuum cleaners for cleaning CNC tanks in the metalworking industry.
- Separation of oil from metal chips and reuse of filtered oil.
- Reduction of machine downtime and maintenance time.
- Tank capacities from 18 up to 264 gal.

THREE-PHASE INDUSTRIAL VACUUMS

- Equipped with side channel blower, up to 39 HP.
- Suitable for continuous operation even in heavy applications
- Container capacity up to 46 gal.
- Highly customisable.

EXPLOSION-PROOF INDUSTRIAL VACUUMS

- Suction in potentially explosive atmospheres, fully grounded and anti-static units.
- NFPA 652 compliant units.
- ATEX certified units.
- Intrinsically safe compressed air-operated vacuums.

HEPA DUST EXTRACTORS

- Maximum protection against fine and silica dust, thanks to 2 stages of filtration up to 0.18 μ efficiency with HEPA 14 filter.
- Safe dust collection, thanks to the Longopac bagging system
- Easy to transport and connect to other working equipment such as floor grinders or scarifiers.
